Get ready to learn what's new in nurse triage! From the **Company Nurse Mobile App**, to integrations with **PublicSchoolWORKS** and **telemed**, we have several exciting innovations to share.

Want to learn even more about what's happening at Company Nurse? Let us know and we'll set up a time to chat!

NEWS

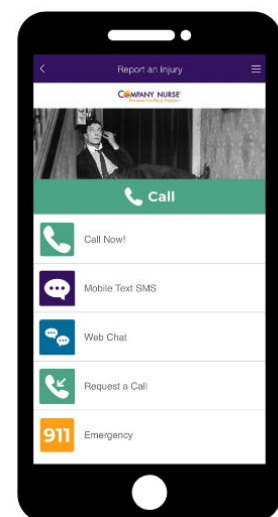

Introducing the Company Nurse Mobile App

Workplace injuries happen. And dealing with those injuries is a pain. To lessen the pain of the injury process, provide your employees with the **Company Nurse Mobile App**.

The app is designed to give your employees simple and direct access to Company Nurse.

And with our **Mobile App Guide**, your employees will have step-by-step instructions for making the most of the app.

Let us know if you want to learn more and we'll schedule time to talk about how this will benefit your employees and your results.

You can find us at these events and tradeshow:

- [RIMS](#): April 28th- May 1st
- [PRIMA](#): June 9th- 12th
- [WCI](#): August 11th- 14th

Integrate Company Nurse and PublicSchoolWORKS for Your Injury and Accident Management Solution

Workplace injury and accident management can be a time-consuming, paper-based, administrative task for your central office.

When you integrate [Company Nurse](#) and [PublicSchoolWORKS](#), the number one provider of complete, online safety and regulatory compliance programs for K-12 schools, you'll have an easy-to-use, cost-efficient, yet powerful accident management solution that will give your district the time and capacity to focus on priorities, not processes.

How does the integration work? Company Nurse automatically feeds injury incident reports into the PublicSchoolWORKS accident management program, removing the manual burden of accident management and ensuring there is no delay in reporting and addressing hazards.

Learn more about this powerful solution, [here](#).

How to Maximize Your Telemedicine Results for Workplace Injuries

By Debra Spamer, vice president of business development

Telemedicine – it's been a buzzword in the workers' comp industry for years. And now we're finally seeing it put into practice for workplace injuries.

When workers sustain injuries in the workplace, telemedicine can provide them with convenient care and minimize the impact to their productivity, reducing the costs to your organization.

So, how can you maximize your telemedicine results?

For the best telemedicine outcome, the injured worker needs to be engaged in the injury management process and compliant to care. This is accomplished through a combination of nurse expertise, ease of access to care, expertise in occupational medicine, and a great patient experience.
